LancerPoint

LancerPoint is PCC's new administrative information system that integrates college business processes into a single point of access for students, staff and faculty. It includes student records, registration, financial aid, fiscal services and human resources.

The 18-month implementation of LancerPoint began on September 10, 2012 and ended in January 2014. It entailed new hardware and software, data migration, business process redesign, and training for staff and faculty.

LancerPoint development affects every area of the college and requires clear and open communication and participation from everyone.

For the latest news, visit LancerPoint on PCC Pulse and follow the project on Twitter @LancerPoint.
